

fulcrum

Fulcrum is a hosted mobile forms platform that enables you to build custom apps for capturing information from the field. Build your forms using the intuitive, web-based drag-and-drop designer.

Deploy

Deploy your customized forms to your mobile users with the Fulcrum mobile application. Take your data collection ideas from a whiteboard concept to a deployed application in minutes.

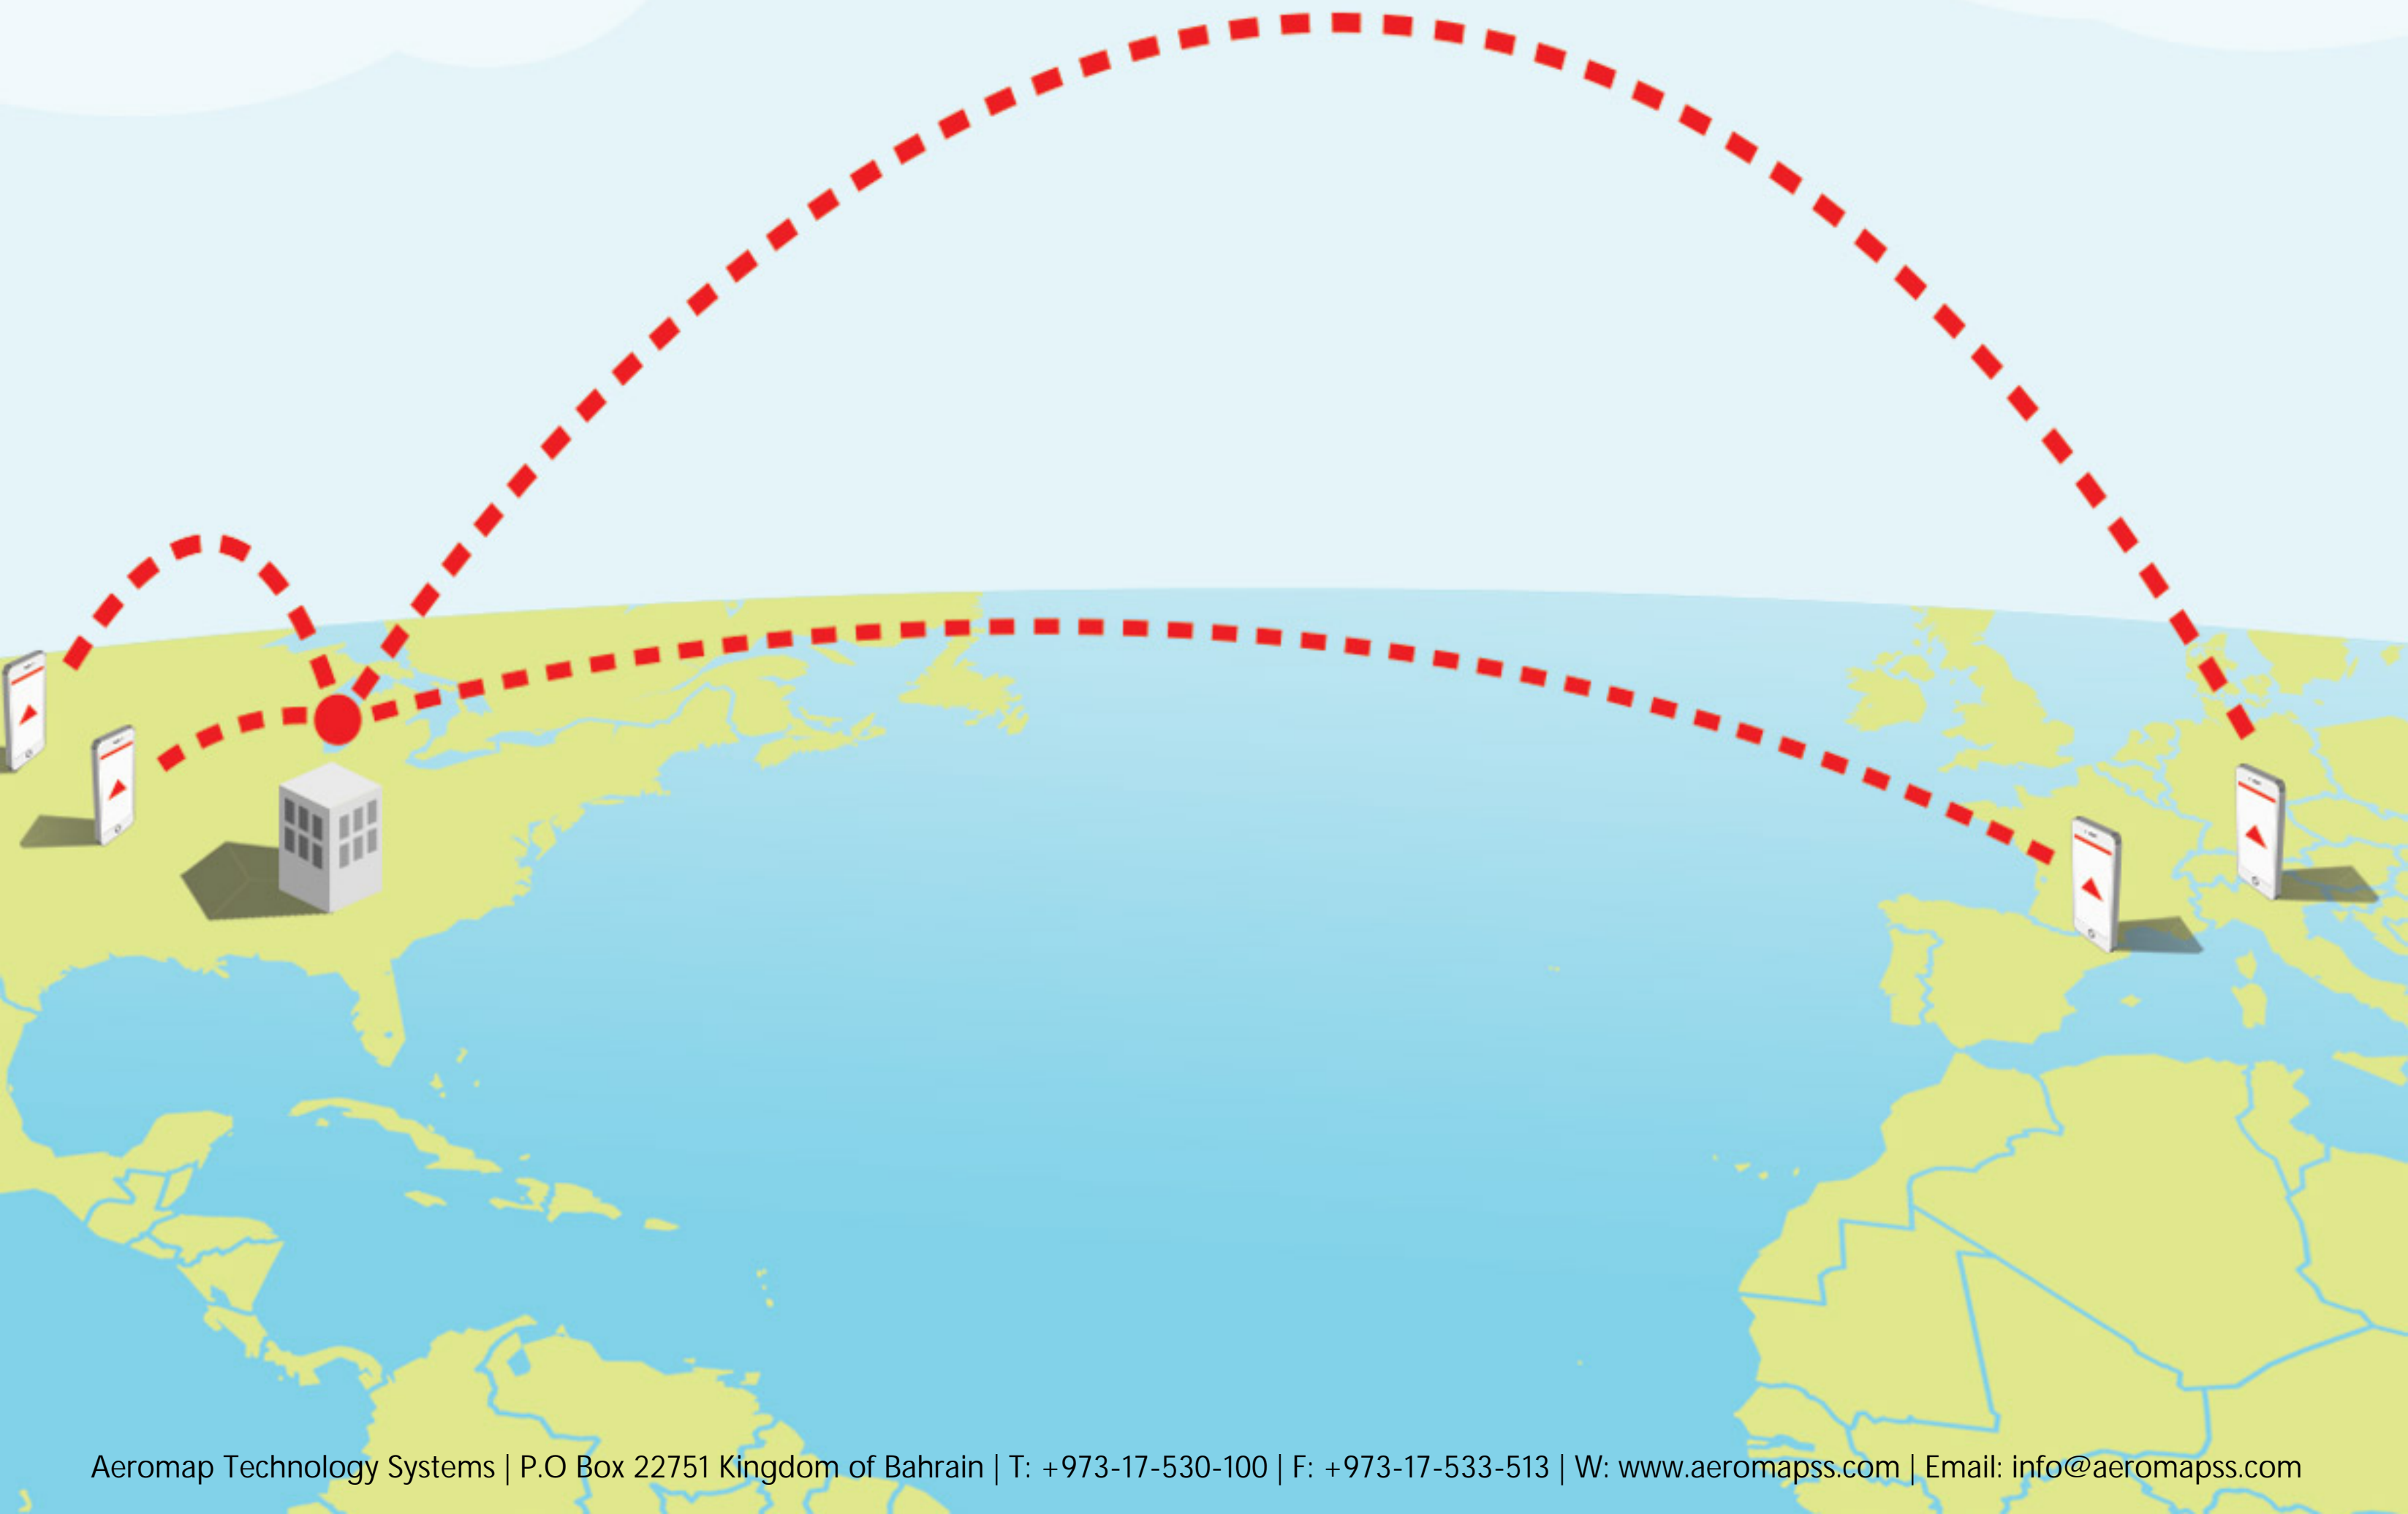

Collect

Collect data using tablet or smartphone devices. Gathering information like text, photos, video, audio, signatures, barcodes, GPS location, and more.

Sync to Cloud

When you sync your mobile device, data is sent back to your Fulcrum cloud account where it can be combined, visualized, and reported on back in the office.

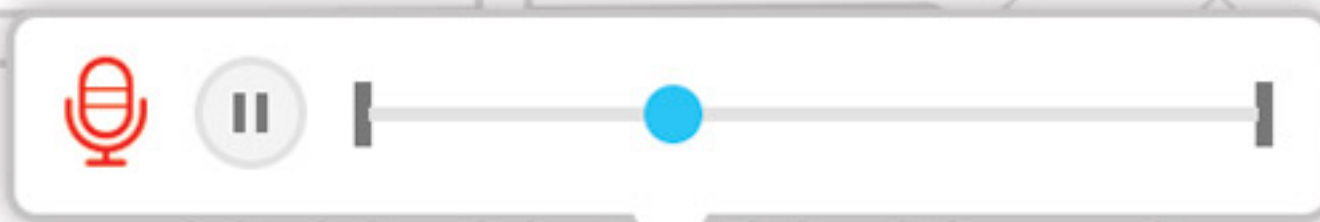

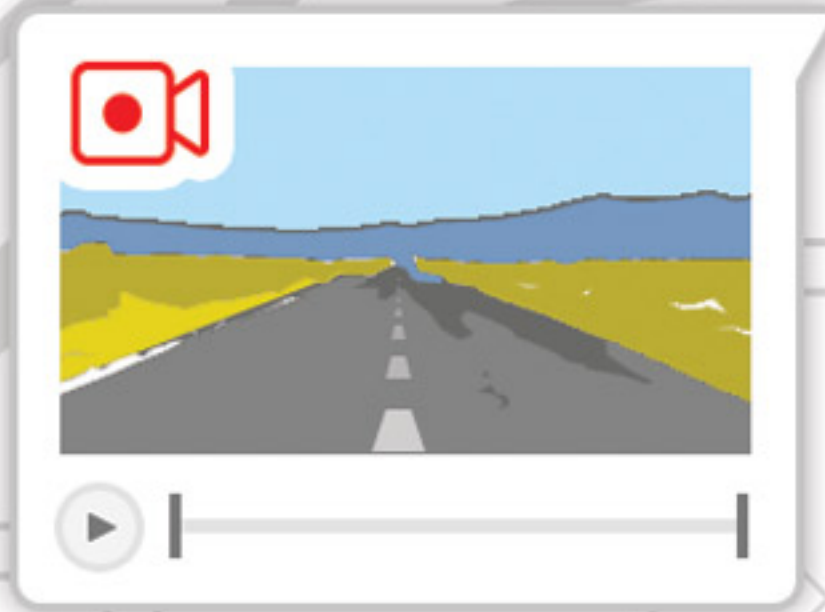

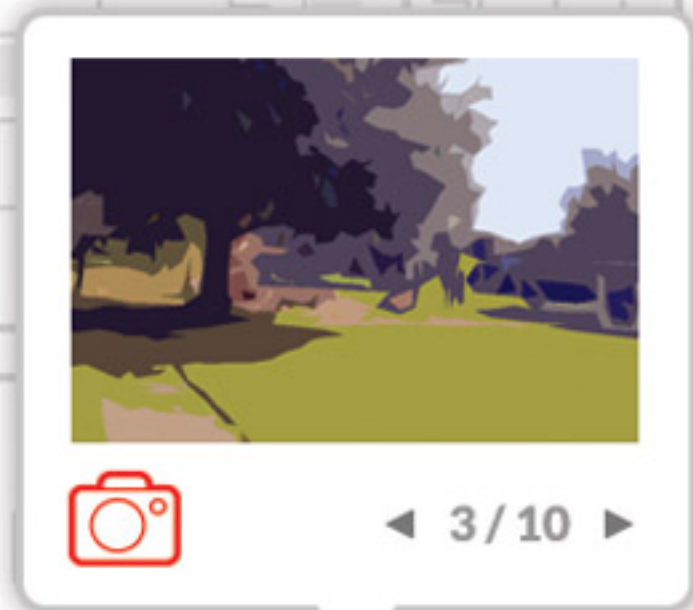

Use Offline

Fulcrum can be used offline in fully disconnected environments to collect data. Data is stored on the device and is synced back to the cloud once you reach wi-fi or cellular coverage.

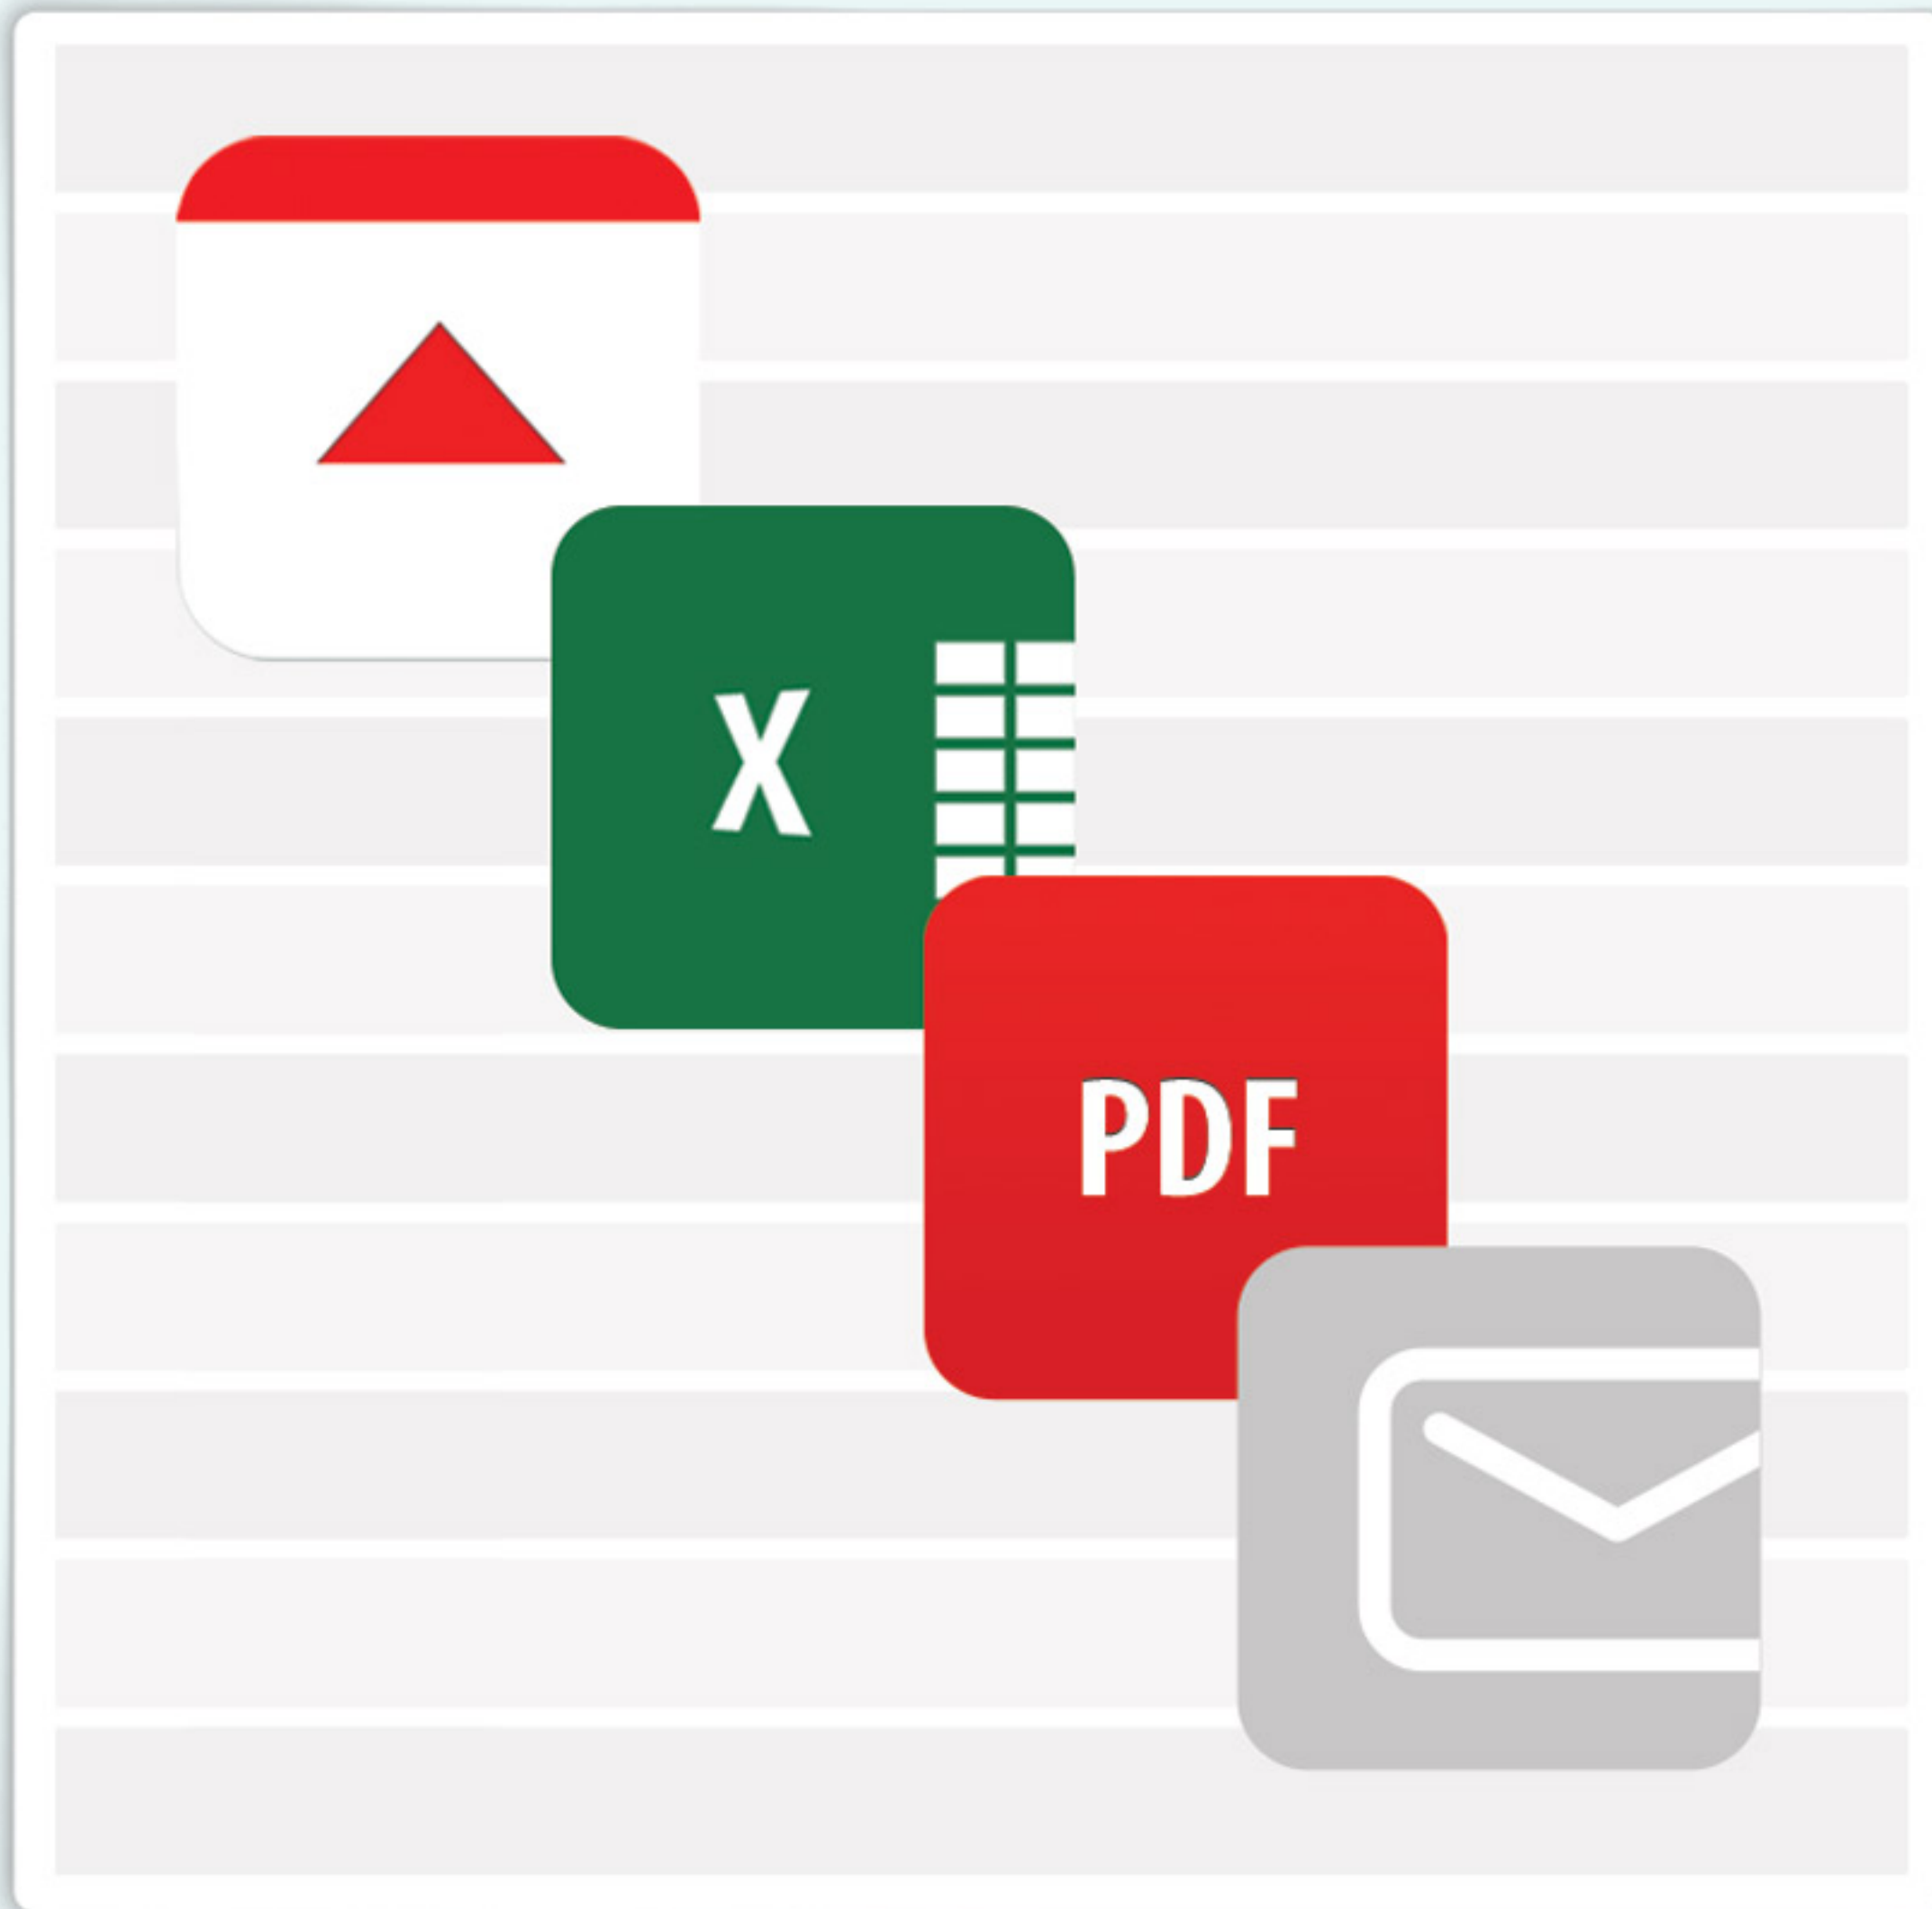

Collect Rich Media

Capture spatially referenced pictures, record videos, or collect audio notes and upload to the cloud.

Generate Reports

Report on your data using powerful visualization, QA, and data management tools.
